Solution / Requirement

Design Review

Implement an automated data interface (PL/SQL) that will allow the CORT Tool to feed data to the Army Virtual Contracting Enterprise (VCE) report tables from the following CORT Tool database tables:

- CORT_CONTRACT
- CORT_DOCUMENT
- CORT_USER_COURSE
- CORT_USER_EXPERTISE
- CORT_USER_ROLE

Current Process

Design Review

- None

Design Review

Proposed Process

- Create PL/SQL processes that will feed data from the CORT_CONTRACT, CORT_DOCUMENT, CORT_USER_COURSE, CORT_USER_EXPERTISE and CORT_USER_ROLE tables to the corresponding VCE report tables.

- Processes will run daily at a pre-determined time.

- Processes will only select Army specific data for contract nominations and CORT Tool users that has been created or modified on the date the process runs.

Applications Needing Updates

Transactional Database Changes

- To Be Determined

Reporting Database Changes

- To Be Determined

Interfaces Change

Design Review

CORT Contract Table

- Select all contract nomination data from the CORT_CONTRACT database table where the department equals 'Army' and the create date or change date equal the current date.

- Update corresponding Army VCE report table with selected CORT_CONTRACT data.

- Need to identify corresponding Army VCE report table.

- Need to create process to map 'primary keys' from CORT_CONTRACT table and corresponding Army VCE report table.

Interfaces Change

CORT Document Table

- Select all contract nomination data from the CORT_DOCUMENT database table where the department equals 'Army' and the create date or change date equal the current date.

- Update corresponding Army VCE report table with selected CORT_DOCUMENT data.

- Need to identify corresponding Army VCE report table.

- Need to create process to map 'primary keys' from CORT_DOCUMENT table and corresponding Army VCE report table.

Interfaces Change

Design Review

CORT User Course Table

- Select all contract nomination data from the CORT_USER_COURSE database table where the department equals 'Army' and the create date or change date equal the current date.

- Update corresponding Army VCE report table with selected CORT_USER_COURSE data.

- Need to identify corresponding Army VCE report table.

- Need to create process to map 'primary keys' from CORT_USER_COURSE table and corresponding Army VCE report table.

Interfaces Change

Design Review

CORT User Expertise Table

- Select all contract nomination data from the CORT_USER_EXPERTISE database table where the department equals 'Army' and the create date or change date equal the current date.
- Update corresponding Army VCE report table with selected CORT_USER_EXPERTISE data.
- Need to identify corresponding Army VCE report table.
- Need to create process to map 'primary keys' from CORT_USER_EXPERTISE table and corresponding Army VCE report table.

Interfaces Change

CORT User Role Table

- Select all contract nomination data from the CORT_USER_ROLE database table where the department equals 'Army' and the create date or change date equal the current date.

- Update corresponding Army VCE report table with selected CORT_USER_COURSE data.

- Need to identify corresponding Army VCE report table.

- Need to create process to map 'primary keys' from CORT_USER_COURSE table and corresponding Army VCE report table.
